I drive a truck coast to coast for a living. The xm radio is a valuable piece of equipment in my truck. It allows me to know what the road and weather conditions are like in the areas of the country I'm going to be driving thru and to. The advantage of the constant traffic update is very important to me because i don't have to listen to a reporter in a helicopter (very noisy background) talking 90 miles per hours because the radio staion only gives the reporter 20 seconds to give the listeners a road report before going to 5 minutes of commercials or playing the same song for the 8th time that day. If you allow the lobbiest for the National Association of Broadcasters to dictate what can be played on a service that I pay for since the local stations don't pay any attention to the common folk, then I feel our taxpayer money is being wasted on special interest groups that have no regard for the ewveryday working people. Don't allow the NAB to dictate what i can listen to on a service i pay for. Thank you Phillip Gibson
